Subject: Urban Greening for Sustainable Comm Program

Good Afternoon,

I had a few questions/comments as it relates to the project grant program.

- It appears, from the guidelines, that redevelopment agencies and joint powers authorities are ineligible to apply for a grant. Is that the case?
- I have some confusion about the language. The Statutory requirements say that projects must a) use or mimic natural systems; or b) create, enhance, expand community green spaces. Additionally, under the ineligible list of projects, it lists *Projects that create or improve roads for motorized use*. Is a project that improves roads for non-motorized uses eligible? It doesn't seem to fall under A or B, yet it is for a non-motorized use.
- I assume a hardscape project such as a plaza for community gatherings and farmer's markets is not necessarily ineligible?
- I think some clarification on how we determine if our community (redevelopment area or Sacramento) is vulnerable to climate change or not.

Thanks for your time and consideration.

Brad Satterwhite
